

Technical requirement for: **Male CAT5 Inline Coupler**

P/N - 101771

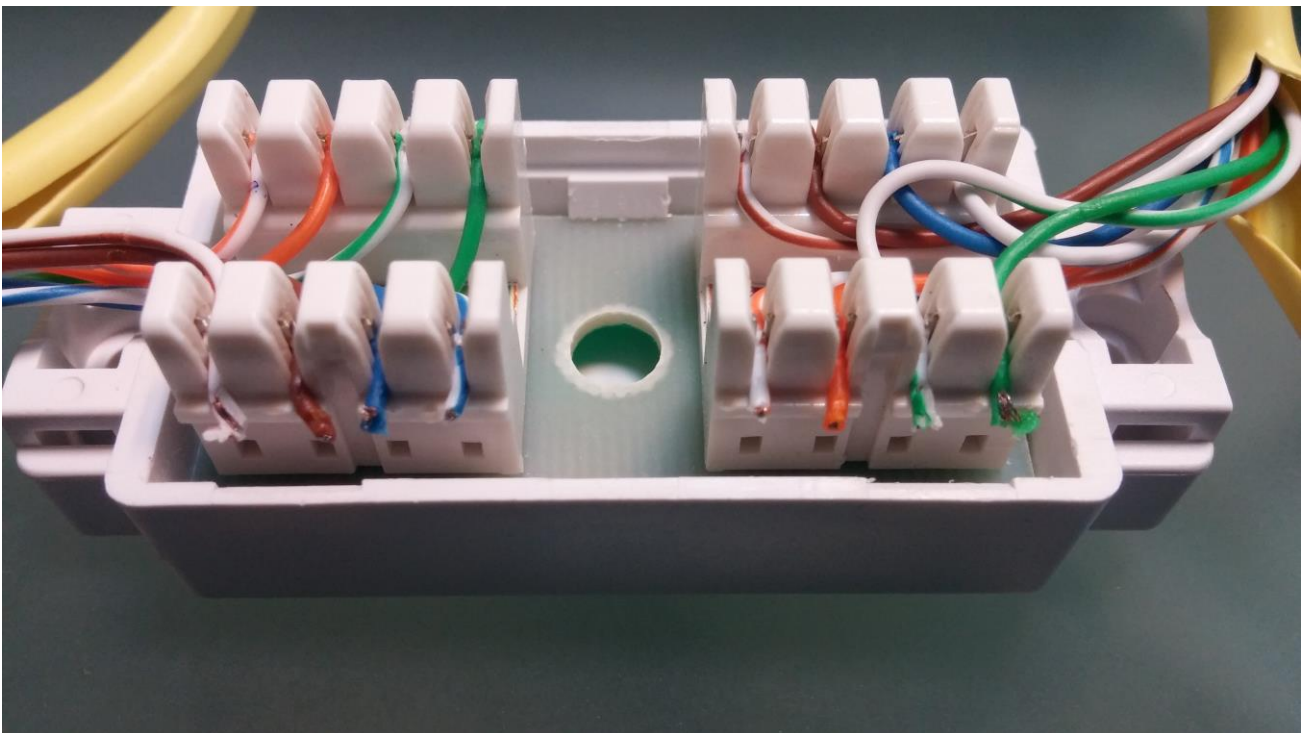

1. Description:

RBS-Telecom's CAT5e standalone RJ45 straight inline coupler provides a male-to-male, feed through connection. It allows you to extend the length of a CAT5e cable by adding another CAT5e cable.

2. Features:

- For CAT5 and CAT5e applications
- Create a permanent join when using solid network cables.
- A surface mounted cat5e coupler block with punchdown (push down) Krone connections.

3. Keystone Packing:

Each PE-Bag will contain 1 pcs of Male to Male CAT5 Coupler together with the following accessories:

1. **2 (two)** screws that will fit the screw socket of the male inline coupler and can help the technician to mount and install the inline coupler.
2. **2 (two)** Strips that can secure the cables on both ends to the inline coupler.
3. **1 (one)** two-way sticker which can be glued to the bottom end of the inline coupler and stick it to a dry surface.

Please see example picture below:

- Every 5 pcs. Of Inline Male Coupler will be packed into a larger PE-Bag on which you will put the 5pcs PE-Bag sticker which is described below in section 4

□ 4

Box packing:

- 3.1. Box quantity: Carton box will contain 100 X 5pcs PE Bags (a total of 500 connectors).
- 3.2. Outside box packing: The 2 other opposite sides of the box should have RBS logo on them (see para. 4)
- 3.3. Each box will contain P/N, Item description and total number of units as can be seen below.
